

A SYSTEM, METHOD AND ARTICLE OF MANUFACTURE FOR GLOBAL LOG-IN CAPABILITIES IN A SUPPLY CHAIN SYSTEM

ABSTRACT OF THE INVENTION

A system, method, and article of manufacture are provided for allowing a user to login from anywhere in the world utilizing a network. First, a request to login is received from a user. Next, in response to the request, the selection of a language to be used during the login is allowed. Further, a virtual input device is depicted on a display for allowing the user to login utilizing the selected language.
